ABOUT ME

I am an experienced Software Developer who constantly seeks innovative solutions. In my 4+ years in this industry, I am continually perfecting my logical thinking and collaboration skills. I have worked on several team projects and served as a team lead for the last few. These experiences with EUIITSols, along with some of my personal projects, make me a good fit for this job and I would like to continue specialising in software development.

EXPERIENCE

EUIITSols, 3 Caragh Meadows, Naas, Co. Kildare, Ireland
Junior Software Developer (Remote)

January 2022 – Present

- Led development of a **Python-based AI Face Swapping** module for a book e-commerce site (Laravel), enabling users to order **personalized books** with their own images.
- Developed the beta module for **Dhaka Pharmacy**, a B2C pharmacy system, helping streamline operations and supporting local pharmacy businesses.
- Redeveloped the **Institute of Chartered Secretaries of Bangladesh (ICSB)** website and CMS, increasing online viewership by 120–150% and projected to close this year with nearly 1 million gross visitors.
- Contributed to the **Polytechnic Institute Management System (PIMS)**, which digitalized administrative processes, reducing manual tasks by 80–85% for polytechnic institutes and fully transforming operations for course-based institutes.
- Developed a **Multi-Vendor Job Application Platform** allowing admins to launch independent job portals via subdomains, complete with custom branding, job postings, and applicant tracking.
- Worked on several smaller projects **Hosting & Client Management System, Organization Member & Accounting Management Software, Map photo frame** and more.

Freelancing
Fiverr & Upwork

April 2020 – Present

- Rebuilt and optimized a client's AI-based **social media platform** in Laravel launched v2.0 in just 4 weeks, scaling to 2M+ daily requests, 1.5K peak concurrent users, 51K+ unique visitors (30 days).
- Developed **Singo, a music distribution** platform that attracted over 10,000 real-life musicians and became the 4th top music distribution company in Germany.
- Designed and implemented an **Event Management System** for seamless event planning and attendee tracking.
- Built an AI-powered **Summarization Application** for researchers, capable of extracting summaries from various file types, significantly reducing research time.
- Created an AI-driven **Scraping Tool** capable of scanning selected areas in minutes and generating detailed lists of available hotels and rooms.
- Worked on countless modification and bug-fixing projects, gaining extensive experience in reviewing, optimizing, and debugging code, which honed my logical and problem-solving abilities.

EDUCATION

Hajee Mohammad Danesh Science and Technology University, Dinajpur, Bangladesh
Bachelor of Science (Engineering) in Electronics and Communication Engineering

TOP SKILLS

Core Expertise: Python | PHP | Laravel | JavaScript | jQuery | MySQL | HTML | CSS | Bootstrap | Git | Postman | GitHub Action

Also Familiar With: Flask | Fast API | Django | Artificial Intelligence | CodeIgniter | WordPress | Basics of Graphic Design | Docker | Microservice
